

**Lots of things
went out of fashion.**

Sadly, syphilis didn't.

Cases of syphilis are on the rise, again.

Syphilis is a bacterial infection that, if left unchecked, can cause damage to the nerves, bones, skin, eyes and brain. Symptoms may not be obvious, so testing is the only way to know if you have it.

Don't send a cheque or money order, just ask you medical professional for a blood test today.

Where: M Clinic, GP on Beaufort
Royal Perth Hospital
South Terrace Clinic or Your GP

When: NOW!
